

Setup and install SSL VPN Client

1. Open Internet Explorer and in the address bar type the name or IP address of your Gateway Client. You will get this from your Network Administrator.
2. On the login screen you will see a link that says "Click Here for SSL VPN Login"

3. Use the user name and password provided by your administrator to login.
4. Follow the instructions on the screen to install the NetExtender ActiveX control.
5. Once the NetExtender is installed you will need to restart your computer.
6. Once your PC is restarted open Internet Explorer and go back to the login page from above.
7. Enter your User Name and Password and NetExtender will popup and say you are connected.

Once you are connected you have full access to all network shares as if you were in the office.
